b. ## Website and listserve update:

There was talk of doing away with the website and just using Facebook, Instagram, etc. Members present want the website to continue. Tony has researched a new website host called Ionos. The first year is $19.86 then $120 per year after. That includes more storage space than current host. Can not move everything to the new host until current contract ends some time in November.

c. ## Listserve/Email:

Tony created a new group email list through goups.io. Sending an email to the group goes to everyone registered on the list. There are 29 members currently subscribed. Any one wanting to join, send an email to Paco+subscribe@groups.io. You must be approved before being able to post an email.

d. **State of the Club – what do we want?**

After discussion it was decided to do a 50-50 mix. Some folks want more primitive outings, others prefer more amenities. Trip leaders will determine which way to proceed at each outing. Check the website event schedule for information on each outing.
